### Electric tacker with focused power.

The driving force is controlled automatically by hand pressure. The harder you press, the heavier the stapling effect. The single-handed grip, to suit both right and left handers, leaves the other hand free to hold and guide the material and focus power, the tool also has a safety catch. A removable front plate means that it's easy to remove any staples or brads that gets jammed. The universal magazine accepts both staples and brads. The product is according to CE regulations.

#### Technical information:

Weight: 1.6 kg

Loading: Top loading magazine

Loading capacity: 165 staples

Firing rate: 30/min

Cord: 2.4 m

Nose length: 9 mm

Nailing distance to wall: 28 mm
