

Bona 8700 Platinum Ceramic Abrasive

Sanding

Technical data sheet

Basis of very high abrasive and extreme aggressiveness of the new Aggressive Bona abrasive grain is the innovative design of ceramic aluminum oxide. This material goes up in terms of its hardness, almost in diamonds and is particularly robust and durable. This achieves an optimum grinding action at a significantly higher service life of the belts. This ensures an economical work process - even under difficult conditions.

- Very high performance thanks to high stability
- Efficient dust-extraction
- Very good life time
- For severe applications on belt sanders
- Coarse sanding on hard wood

Technical data

Grain Type: Ceramic and Aluminium Oxid
Coating: Electrostatically, closed coat
Backing: Polyester Backing
Bonding: Synthetic resin

Paper Sizes

	Belts	Discs	Discs with hole	rolls
Available Size	200 x 550mm 200 x 750mm 250 x 750mm	100mm 125mm 150mm 178mm		203mm x 25m 254mm x 25m 305mm x 25m
Grain Typ	Ceramic+ AluOxid,	Ceramic+ AluOxid	Ceramic+ AluOxid	Ceramic+ AluOxid
Coating	Electrostatically	Electrostatically	Electrostatically	Electrostatically
Backing	Y-weight cloth, cotton 36+50	Y-weight cloth, cotton 36+50	Y-weight cloth, cotton 36+50	Y-weight cloth, cotton 36+50
Bonding	Resin over resin	Resin over resin	Resin over resin	Resin over resin
Coarse sanding	36+50	36+50	36+50	36+50
