SAFETY DATA SHEET

Bona Decking Oil

Section 1. Identification

Product name	: Bona Decking Oil
Product type	: Liquid.
Relevant identified uses of	the substance or mixture and uses advised against
Supplier's details	: Look Floors 9 Industry road Penrose Auckland New Zeeland info@lookfloors.co.nz 09 525 0652
Emergency telephone number (with hours of operation)	: National Poisons Centre 0800 POISON or 0800 764 766
e-mail address of person responsible for this SDS	: Environment@bona.com

Section 2. Hazards identification

HSNO Classification

: 6.3 - SKIN IRRITATION - Category B 6.4 - EYE IRRITATION - Category A (Irritant)

This material is classified as hazardous according to criteria in the Hazardous Substances (Minimum Degrees of Hazard) Regulations 2001 and has been classified according to the Hazardous Substances (Classifications) Regulations 2001.

This material is not classified as DANGEROUS GOODS according to criteria in New Zealand Standard 5433:2012 Transport of Dangerous Goods on Land.

GHS label elements

Signal word	:	Warning
Hazard statements	1	Causes mild skin irritation. Causes serious eye irritation.
Precautionary statements		
Prevention	:	Wear eye or face protection. Wash thoroughly after handling.
Response	:	If skin irritation occurs: Get medical advice/attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Storage	:	Not applicable.
Disposal	:	Not applicable.
Symbol	:	
Other hazards which do not result in classification	:	Contains drying oils. Risk of self-ignition. Cloths, rade, paper and similar materials contaminated with oil should be placed in

Cloths, rags, paper and similar materials contaminated with oil should be placed in water or in sealed metal containers!

Section 3. Composition/information on ingredients

Substance/mixture : Mixture		
Ingredient name	% (w/w)	CAS number
Tung oil	10 - 25	8001-20-5
1-(2-butoxy-1-methylethoxy)propan-2-ol	2.5 - 10	29911-28-2
Naphtha (petroleum), hydrotreated heavy	1 - 2.5	64742-48-9

Section 3. Composition/information on ingredients

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary fir	<u>t aid measures</u>			
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.			
Ingestion	: Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.			
Skin contact	: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention if adverse health effects persist or are severe. Wash clothing before reuse. Clean shoes thoroughly before reuse.			
Eye contact	: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.			
Most important symptoms/e	fects, acute and delayed			
Potential acute health effe	<u>ts</u>			
Inhalation	: No known significant effects or critical hazards.			
Ingestion	: No known significant effects or critical hazards.			
Skin contact	: Causes mild skin irritation.			
Eye contact	: Causes serious eye irritation.			
Over-exposure signs/symptoms				
Inhalation	: No specific data.			
Ingestion	: No specific data.			
Skin	: Adverse symptoms may include the following: irritation redness			
Eyes	: Adverse symptoms may include the following: pain or irritation watering redness			
Indication of immediate med	ical attention and special treatment needed, if necessary			
Specific treatments	: Not available.			
Notes to physician	: No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.			
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.			
See toxicological informatic	ו (Section 11)			

Section 5. Firefighting measures

Extinguishing media		
Suitable	:	Use an extinguishing agent suitable for the surrounding fire.
Not suitable	:	None known.
Specific hazards arising from the chemical	:	In a fire or if heated, a pressure increase will occur and the container may burst.
Hazardous thermal decomposition products	:	Decomposition products may include the following materials: carbon dioxide carbon monoxide
Hazchem code	:	Not available.
Special precautions for fire- fighters	:	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	:	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see Section 8).
Environmental precautions	:	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods and material for cor	<u>ita</u> i	inment and cleaning up
Small spill	:	Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	:	Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling	:	Put on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapour or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
Conditions for safe storage, including any incompatibilities	:	Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name			Exposure limits
Naphtha (petroleum), hydrotreated heavy		ed heavy	EH40/2005 WELs (United Kingdom (UK)). TWA: 1000 mg/m ³ 8 hours.
Appropriate engineering controls	:	control worker exposure to airborne co ingredients with exposure limits, use p	Good general ventilation should be sufficient to ontaminants. If this product contains process enclosures, local exhaust ventilation or rker exposure below any recommended or
Environmental exposure controls	:		
Individual protection measu	<u>ires</u>		
Hygiene measures	:	eating, smoking and using the lavatory Appropriate techniques should be use	ughly after handling chemical products, before y and at the end of the working period. d to remove potentially contaminated clothing. eusing. Ensure that eyewash stations and tation location.
Respiratory protection	:	standard if a risk assessment indicate	ir-fed respirator complying with an approved s this is necessary. Respirator selection must osure levels, the hazards of the product and respirator.
Hand protection	:	be worn at all times when handling ch this is necessary. Considering the par check during use that the gloves are s should be noted that the time to break	
Eye protection	:	assessment indicates this is necessar gases or dusts. If contact is possible,	proved standard should be used when a risk y to avoid exposure to liquid splashes, mists, the following protection should be worn, her degree of protection: chemical splash
Skin protection	:	Personal protective equipment for the	body should be selected based on the task d and should be approved by a specialist

Section 9. Physical and chemical properties

Vapour pressure	:	Not available.
Vapour density	:	Not available.
Relative density	:	0,95 to 1,06
Solubility	:	Not available.
Solubility in water	:	Not available.
Partition coefficient: n- octanol/water	:	Not applicable.
Auto-ignition temperature	:	Not applicable.
Decomposition temperature	:	Not applicable.
Viscosity	:	Not available.
Flow time (ISO 2431)	:	Not available.
Aerosol product		
Type of aerosol	:	Not applicable.
Heat of combustion	:	Not available.
Ignition distance	:	Not applicable.
Enclosed space ignition - Time equivalent	:	Not applicable.
Enclosed space ignition - Deflagration density	:	Not applicable.
Flame height	:	Not applicable.
Flame duration	:	Not applicable.

Section 10. Stability and reactivity

Chemical stability	: The product is stable.	
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.	
Conditions to avoid	: No specific data.	
Incompatible materials	: No specific data.	
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.	

Section 11. Toxicological information

Information on likely routes of exposure

Inhalation	:	No known significant effects or critical hazards.		
Ingestion	:	No known significant effects or critical hazards.		
Skin contact	:	Causes mild skin irritation.		
Eye contact	:	Causes serious eye irritation.		
Symptoms related to the physical, chemical and toxicological characteristics				
Inhalation	:	No specific data.		
Ingestion	:	No specific data.		
Skin contact	:	Adverse symptoms may include the following: irritation redness		
Eye contact	:	Adverse symptoms may include the following: pain or irritation watering redness		
Delayed and immediate effects as well as chronic effects from short and long-term exposure				

Acute toxicity

Section 11. Toxicological information

Product/ingredient name	Result	Species	Dose	Exposure

Other adverse effects

: No known significant effects or critical hazards.

Section 13. Disposal considerations

 Disposal methods
 The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
