# **SAFETY DATA SHEET**

Bona Wax Oil Refresher

### **Section 1. Identification**

Product name : Bona Wax Oil Refresher

Product type : Liquid.

Relevant identified uses of the substance or mixture and uses advised against

Supplier's details : Look Floors

9 Industry road Penrose Auckland New Zeeland

info@lookfloors.co.nz 09 525 0652

Emergency telephone number (with hours of

number (with hours of

operation)

: Environment@bona.com

e-mail address of person responsible for this SDS

### Section 2. Hazards identification

**HSNO Classification**: Not classified.

This material is not classified as hazardous according to criteria in the Hazardous Substances (Minimum Degrees of Hazard) Regulations 2001.

: National Poisons Centre 0800 POISON or 0800 764 766

This material is not classified as DANGEROUS GOODS according to criteria in New Zealand Standard 5433:2012 Transport of Dangerous Goods on Land.

#### **GHS** label elements

Signal word : No signal word.

**Hazard statements** : No known significant effects or critical hazards.

**Precautionary statements** 

Prevention : Not applicable.

Response : Not applicable.

Storage : Not applicable.

Disposal : Not applicable.

Other hazards which do not : Contains drying oils.

result in classification Risk of self-ignition.

Cloths, rags, paper and similar materials contaminated with oil should be placed in

water or in sealed metal containers!

# Section 3. Composition/information on ingredients

Substance/mixture : Mixture

Ingredient name	% (w/w)	CAS number
Distillates (petroleum), hydrotreated middle	10 - 25	64742-46-7

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Bona Wax Oil Refresher Page: 2/8

### Section 4. First aid measures

#### **Description of necessary first aid measures**

**Inhalation** : Remove victim to fresh air and keep at rest in a position comfortable for breathing.

Get medical attention if symptoms occur.

Ingestion : Wash out mouth with water. Remove victim to fresh air and keep at rest in a

position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms

occur.

Skin contact : Flush contaminated skin with plenty of water. Remove contaminated clothing and

shoes. Get medical attention if symptoms occur.

**Eye contact**: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower

eyelids. Check for and remove any contact lenses. Get medical attention if irritation

occurs.

#### Most important symptoms/effects, acute and delayed

#### Potential acute health effects

Inhalation: No known significant effects or critical hazards.Ingestion: No known significant effects or critical hazards.Skin contact: No known significant effects or critical hazards.Eye contact: No known significant effects or critical hazards.

#### Over-exposure signs/symptoms

Inhalation: No specific data.Ingestion: No specific data.Skin: No specific data.Eyes: No specific data.

#### Indication of immediate medical attention and special treatment needed, if necessary

**Specific treatments** : Not available.

Notes to physician : No specific treatment. Treat symptomatically. Contact poison treatment specialist

immediately if large quantities have been ingested or inhaled.

**Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

# Section 5. Firefighting measures

### **Extinguishing media**

**Suitable**: Use an extinguishing agent suitable for the surrounding fire.

Not suitable : None known.

Specific hazards arising from the chemical

: In a fire or if heated, a pressure increase will occur and the container may burst.

Hazardous thermal

: No specific data.

decomposition products
Hazchem code

: Not available.

Special precautions for fire-

fighters

: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without

suitable training.

Special protective equipment for fire-fighters

: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Bona Wax Oil Refresher Page: 3/8

### Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment (see Section 8).

**Environmental precautions** 

: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

#### Methods and material for containment and cleaning up

**Small spill** 

: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill

Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

### Section 7. Handling and storage

Precautions for safe handling

: Put on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas.

Conditions for safe storage, including any incompatibilities

: Store between the following temperatures: 5 to 25°C (41 to 77°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

# Section 8. Exposure controls/personal protection

#### **Control parameters**

**Occupational exposure limits** 

Ingredient name	Exposure limits
Distillates (petroleum), hydrotreated middle	NZ HSWA 2015 (New Zealand, 6/2016).  WES-TWA: 5 mg/m³ 8 hours. Form: Mist  WES-STEL: 10 mg/m³ 15 minutes. Form:  Mist

Appropriate engineering controls

: No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.

Environmental exposure controls

: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

#### **Individual protection measures**

Hygiene measures

: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Bona Wax Oil Refresher Page: 4/8

## Section 8. Exposure controls/personal protection

**Respiratory protection** 

Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

**Hand protection** 

: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. > 8 hours (breakthrough time): nitrile rubber

Eye protection

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

**Skin protection** 

: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

# Section 9. Physical and chemical properties

**Appearance** 

**Physical state** : Liquid. [Viscous liquid.]

Colour : Brown. [Light] Odour Characteristic. **Odour threshold** : Not applicable. pН : Not applicable. **Melting point** Not available.

**Boiling point** Not available.

Flash point : Closed cup: >100°C (>212°F)

**Evaporation rate** Not available. Flammability (solid, gas) : Not applicable. Lower and upper explosive : Not applicable.

(flammable) limits

: Not available. Vapour pressure Vapour density Not available. : Not available. Relative density

Solubility : Insoluble in the following materials: cold water and hot water.

: Not available. Solubility in water Partition coefficient: n-: Not applicable.

octanol/water

: Not applicable.

**Auto-ignition temperature Decomposition temperature** : Not applicable.

**Viscosity** : Kinematic (room temperature): >0,3 cm<sup>2</sup>/s (>30 cSt)

Flow time (ISO 2431) : Not available.

Aerosol product

Type of aerosol : Not applicable. **Heat of combustion** : Not available. : Not applicable. Ignition distance **Enclosed space ignition -**: Not applicable.

Time equivalent

**Enclosed space ignition -**

**Deflagration density** 

: Not applicable.

: Not applicable. Flame height Flame duration : Not applicable.

Bona Wax Oil Refresher Page: 5/8

# Section 10. Stability and reactivity

**Chemical stability** 

: The product is stable.

Possibility of hazardous reactions

Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid Incompatible materials

: No specific data.

**Hazardous decomposition** 

: No specific data.

products

: Under normal conditions of storage and use, hazardous decomposition products

should not be produced.

# **Section 11. Toxicological information**

#### Information on likely routes of exposure

Inhalation No known significant effects or critical hazards. : No known significant effects or critical hazards. Ingestion **Skin contact** : No known significant effects or critical hazards. Eye contact : No known significant effects or critical hazards. Symptoms related to the physical, chemical and toxicological characteristics

Inhalation : No specific data. Ingestion : No specific data. **Skin contact** : No specific data. **Eve contact** : No specific data.

Delayed and immediate effects as well as chronic effects from short and long-term exposure

#### **Acute toxicity**

Not available.

#### **Irritation/Corrosion**

Not available.

#### **Sensitisation**

Not available.

#### Potential chronic health effects

General Inhalation : No known significant effects or critical hazards.

 No known significant effects or critical hazards. Ingestion No known significant effects or critical hazards. **Skin contact** : No known significant effects or critical hazards.

**Eye contact**  No known significant effects or critical hazards. Carcinogenicity No known significant effects or critical hazards. Mutagenicity : No known significant effects or critical hazards. **Teratogenicity**  No known significant effects or critical hazards. **Developmental effects** : No known significant effects or critical hazards.

**Fertility effects Chronic toxicity**  : No known significant effects or critical hazards.

Not available.

#### Carcinogenicity

Not available.

#### **Mutagenicity**

Not available.

#### **Teratogenicity**

Not available.

### **Reproductive toxicity**

Bona Wax Oil Refresher Page: 6/8

# **Section 11. Toxicological information**

Not available

**Specific target organ toxicity** 

Not available.

**Aspiration hazard** 

Not available.

**Numerical measures of toxicity** 

**Acute toxicity estimates** 

Not available.

## Section 12. Ecological information

**Ecotoxicity** 

: No known significant effects or critical hazards.

Aquatic and terrestrial toxicity

Not available.

Persistence/degradability

Not available.

**Bioaccumulative potential** 

Not available.

**Mobility in soil** 

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects : No known significant effects or critical hazards.

# Section 13. Disposal considerations

**Disposal methods** 

The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

### Section 16. Other information

**Key to abbreviations** 

: ADG = Australian Dangerous Goods

ADR = The European Agreement concerning the International Carriage of

Dangerous Goods by Road ATE = Acute Toxicity Estimate BCF = Bioconcentration Factor

GHS = Globally Harmonized System of Classification and Labelling of Chemicals

IATA = International Air Transport Association

IBC = Intermediate Bulk Container

IMDG = International Maritime Dangerous Goods

LogPow = logarithm of the octanol/water partition coefficient

MARPOL = International Convention for the Prevention of Pollution From Ships,

1973 as modified by the Protocol of 1978. ("Marpol" = marine pollution)

RID = The Regulations concerning the International Carriage of Dangerous Goods

by Rail

UN = United Nations
