Brilliant Performance

Bona Diamond Abrasives - tough floor sanding

Now, abrading floors in public areas and sports halls will be as easy as any other sanding project. With Bona Diamond Abrasives you can take on the toughest challenges with total confidence.

Many sports floors, public floors and pre-finished parquet floors are treated with ceramic reinforced UV coatings making good adhesion for overcoating exceptionally difficult to achieve. Uneven sanding means the risk of having to redo work – making your job more time consuming. Not anymore. Using the unique hardness of diamonds, even and secure results can be achieved on the toughest wooden floors. Lasting at least 100m² at a time and leaving no visible swirl marks, Bona Diamond Abrasives ensure smooth and fast performance – giving outstanding results.

Application

- Sports and public wooden floor surfaces before overcoating
- Anti-scratch surfaces
- All UV treated pre-finished parquet floors

Key Benefits

- Improves adhesion for overcoating
- Diamond hardness and cut through
- Faster and safer
- Lasts at least 100m²
- Even and secure result
- No visible swirl marks
- Excellent absorption of floor unevenness

Technical Data

Sanding disc:	Extremely durable abrasive discs with diamond particles grit G 240 Reduces scratch marks
Intermediate pads:	Reduces possibility of sanding down to bare wood Pressure-equalizing foam insulation Velcro system for an easy and fast exchange of discs Can be used for Multidisc & Quattrodisc 1 set delivered in Multidisc & Quattrodisc
Cleaning discs:	Cleans dust away Velcro backing, used for Multidisc & Quattrodisc
